Infrared Fusion Technology

The IR-225 M represents the next generation in fusion technology, building on our history as the pioneers of infrared fusion manufacturing to redefine industrial standards.

Up to 60% reduced cooling time

A unique active cooling system enables the IR-225 M to significantly increase efficiency and help overall project costs.

Lightweight, compact and robust

This machine features a modern base frame design and stronger clamping units. It also comes with a workbench for practical storage of parts and accessories.

Maximized quality control

The fully controlled fusion process provides high reproducibility and reliability with seamless connectivity options, allowing for easy and complete traceability.

Unique portfolio

Materials: PVDF, PP-H, PP-n, ECTFE, PE100, PVC-U, Double Containment System Dimension Range: d63 - d225 mm / 2" - 8" Order number: 790182001

CONNECT

CONNECT Welding Data is our advanced digital solution designed to streamline the transfer of fusion data, enhancing efficiency and productivity.
