Infrared Fusion Technology

Unleash the power of infrared fusion with the new IR-63 M machine, offering the highest levels of reproducibility, reliability, and efficiency for installing plastic piping systems.

50% reduced cooling times

What sets the IR-63 M apart is its up to 50% reduced cooling times, helping to shorten installation times and the overall project cost.

30% fewer process steps

The touchscreen interface enables more efficient processes to increase the performance of the operator.

20% reduced preparation time

Individual-facing values on both sides enable flexibility in design and installation, perfect for precise prefabrication.

All values are in comparison with the IR-63 Plus machine.

2 pipe stops included

- Fixed pipe stop with angle markings and 2 mm facing on both sides
- Adjustable patented pipe stop for individual facing of 0.5 - 3 mm

CONNECT

CONNECT Welding Data is our advanced digital solution designed to streamline the transfer of fusion data, enhancing efficiency and productivity.
