1 Cable Plug M12

Technical Data

Dimension (ft)	5.0 to 164
Dimension (m)	1.5 to 50
Connections	M12
Cable type	RS 485

Description

The power supply and communication cable of the Hycleen Automation System makes a serial connection between all components of the Hycleen Automation System quick and easy.

Features and Functions

The cables contain 2 wires for the power supply and 2 for signal transmission. Both cable ends are equipped with the same female connectors and designed to prevent rotation. The M12 knurled screws provide reliable hold and secure connection even in harsh environments.

- Secure connection of all components
- Simple, serial connection
- Anti-turn design
- Cable easily attaches due to special threaded connection

Installation Tips

When connecting, ensure all components are connected in series with cable connections securely tightened.

Product Code	Designation	Dimension (ft)	Dimension (m)
351110581		5.0	1.5
351110582	Hycleen Automation	16.0	5.0
351110583	Power Supply and	32.0	10.0
351110584	Communication	65.0	20.0
351110585	Cables	164.0	50.0
