Schaffhausen

13 June 2022

Charged up for the future: GF Piping Systems welcomes Marthinus Venter as new Senior Global Business Development Manager for Battery Production.

With over a decade of experience in the global industrial automation market, Venter joins the leading provider of plastic flow solutions in an effort to make battery production more sustainable.

Marthinus Venter specialized in the global lithium-Ion battery market and has worked with the largest secondary battery customers all over the world. He has a background in electrical and electronic engineering, information technology, as well as business and sales in industrial and process automation industries.

From highly energy efficient cooling and water treatment to cutting-edge process automation, GF Piping Systems offers a broad range of products that address the needs and challenges of the battery industry. The corrosion-free plastic components ensure the safe and reliable transport of water and chemicals while also lowering maintenance costs and downtimes for battery manufacturers. With the help of complete solutions, battery manufacturers can optimize their piping systems and reduce their environmental impact.

Marthinus Venter looks forward to his new role at GF Piping Systems: "The automotive industry is going through a critical transformation from traditional combustion engines to electric vehicles. Batteries play a vital role in shaping this future, however manufacturers require modern technology to make their processes as reliable and sustainable as possible. By offering long lasting and highly energy efficient plastic piping systems, I believe that GF Piping Systems can make a valuable contribution."

Meet Marthinus Venter live at The Battery Show Europe, the leading meeting place for the advanced battery and H/EV technology community. The trade fair takes place in Stuttgart from June 28 to 30, 2022. You can visit GF Piping Systems at booth #8-B47.

About GF Piping Systems

As the leading flow solutions provider for the safe and sustainable transport of fluids, GF Piping Systems creates connections for life. The division focuses on industry-leading leak-free piping solutions for numerous demanding end-market segments. Its strong focus on customer-centricity and innovation is reflected by its global sales, service, and manufacturing footprint and its award-winning portfolio, including fittings, valves, pipes, automation, fabrication, and jointing technologies.

GF Piping Systems has its own sales companies in 31 countries, which means it is always by its customers' side. Production sites in 36 locations in America, Europe, and Asia ensure sufficient availability and quick, reliable delivery. In 2021, GF Piping Systems generated sales of CHF 1'971 million and employed 7'686 people. GF Piping Systems is a division of Georg Fischer AG, founded in 1802 and headquartered in Schaffhausen, Switzerland.
