

# Water Breaks

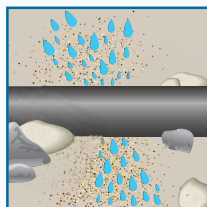

Facts to consider before a repair

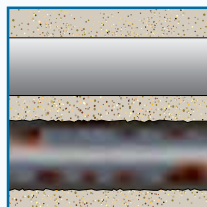

## What are the causes?

Climate influence

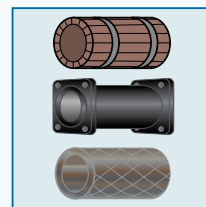

Ground movements

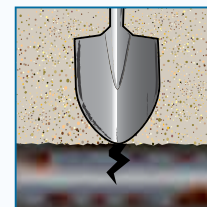

Corrosion

Water hammer

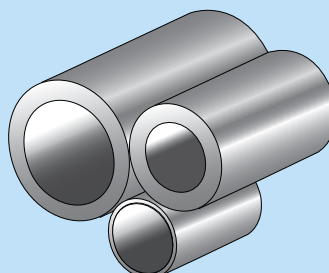

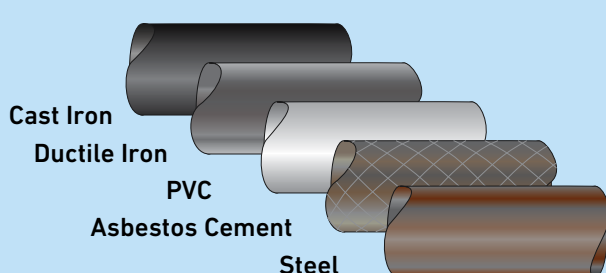

Pipe age

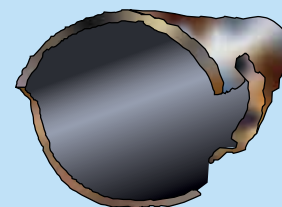

Excavation damage

## Different pipe material, size and condition will limit repair options

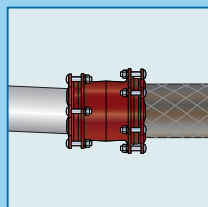

Different outside diameters

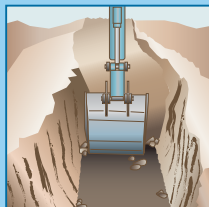

Rough or damaged pipe ends

## Finally, a restraint system that can tackle ALL repairs: MULTI/JOINT® 3000 Plus

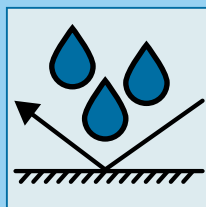

### Your Benefits:

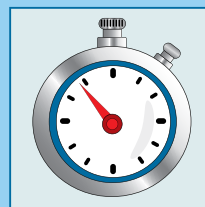

Transition from old to new pipe materials

Smaller trench sizes

Durable & corrosion resistant

Faster installation

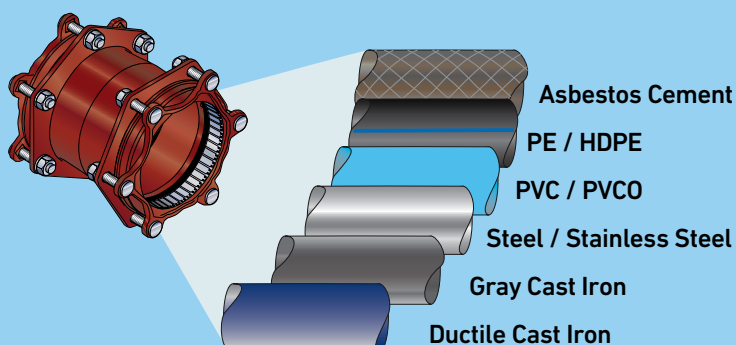

50 year maintenance free

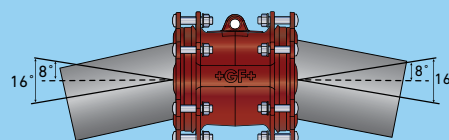

Proven restraint solution for over 30 years

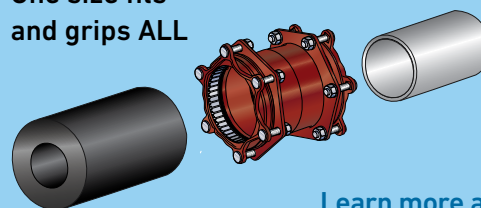

### Suitable for all materials

### Unique angularity

### One size fits and grips ALL
