

Factory Certified PE Training...

In 2019 GF Central Plastics launched Factory Certified PE Training, using our innovative EF equipment, tools and fittings, with a curriculum following the latest ASTM standards, including GFCP best practices, in-person, inside our state of the art Innovation Central training center and showroom.

During 2020, GFCP brought you the same high level training in an on-line format to combat the travel restrictions brought on by the Covid-19 virus.

With the decrease in infection rates and the increase in vaccinations in 2021, GFCP is now OPEN for IN-PERSON TRAINING again. Following CDC guidelines for everyone's continued safety and wellness.

Join us in-person at Innovation Central or on-line for Factory Certified PE Training to become a Master Trainer in Electrofusion!

Visit us at www.gfcp.com and click on Training.
